**Purpose:** To provide guidance to employees when offering extra-curricular activities.

**Procedure:**

Section 179 of *The Education Act, 1995*, states that “a Board of Education or a Conseil Scolaire may authorize the organization of cultural and athletic activities, youth travel, outdoor education and similar activities as features of the educational program of schools”. Therefore, the Division supports the belief that a total educational program involves curricular activities during regular school hours, and also extra-curricular activities that provide opportunity for participation by all students and staff.
