Q & A Build and Scheduling

1. **Is there no way to select the students based off of a filter?**
   Under the Filter (Funnel icon) there is an option for Grade=? So you can select grade by grade!

2. **May be a dumb question - but what is the purpose of indicating sequence number? What is the reasoning for that?**
   Just makes it more organized for students searching for the classes they might want if it's   alphabetical.

3. **Is there a student view so that we can see what they will see during selection?**
   Their view is the same as you would see by going to the Student TT > Schedule ST > Requests SST

4. **Is this the same procedure we will use at elementary?**
   This is for schools who will have students enter their course requests on-line and pertains to High Schools with larger student populations.
