

USING THE EET IN A MULTIGRADE CLASSROOM

The EET can be effectively used with whole groups or in smaller group settings.

The **Expanding Expression Tool** is a multisensory approach that can be used to improve oral language and writing.

K-12

All students will benefit from being introduced to the EET regardless of their age or English language ability.

IMPROVES ORAL & WRITTEN SKILLS

The Expanding Expression Tool encourages growth in both oral and written skills. It helps students to organize their thoughts and focus on key ideas.

DIFFERENTIATED INSTRUCTION

Use of this approach provides opportunities for teachers to differentiate their instruction for students based on where they are and their specific needs.

CROSS CURRICULAR CONNECTIONS

Students are able to easily apply their knowledge of the EET to other content areas such as history, science, and English language arts.

BUILD ON WHAT YOU KNOW

The EET motivates students to clearly define vocabulary, write informational reports, use vibrant details and write from prior knowledge.

"By providing your students with opportunities to participate in spoken language activities, you are providing a foundation for reading and writing."

-Sara Smith (Creator of the Expanding Expression Tool)
