e. Graduation Summary SST

The Graduation provides a view of how a student is progressing toward graduation. It does not show the marks achieved in a course but does indicate whether requirements are completed and for specific subject areas, whether a credit has been earned.

The first section indicates all the required areas and how many credits in each are required to graduated along with the student's progress in each area.

Total		24.0	0.0	14.0	58 % completed

The **Course Breakdown** section indicates course by course completion.

- When a credit gained is bracketed it indicates the course has been counted in a different area, i.e. only one Math credit is required for grade 10. If a student has taken two maths for which they receive credit, in the Math area, one will be shown with brackets around the credit to indicate that it isn't being counted as the Math credit but is counted elsewhere such as an elective.
